COURSE OBJECTIVES

At the completion of this conference, participants will be able to:

- Identify factors the nurse can utilize to enhance and personalize the delivery of multicultural healthcare for children .
- Identify and explore major public health issues involving children from selected cultures which can affect healthcare outcomes..
- Provide interpretation of Children's physical, mental and emotional abuse as defined by cultural influences.
- Identify strategies that would improve healthcare and protect children before they reach crisis points.
- Discuss contributing factors and strategies for prevention of childhood obesity.
- Identify ethical and legal issues that nursing staff could be faced with while caring for children from various cultures.
- Discuss and contrast Western cultural standards related to children advocacy of physical and mental health.
